

2.1 Administration

In the main menu of DBSV you can view the logfile, manage subjects and classes as well as create and edit tests – provided you have the necessary permissions.

Access to the administration part is only available for members of the "Administrators" role. You can manage users and roles here as well as view the logfile.

Only members of "Administrators" can save and clear the logfile.

3.1 Create Tests

Data

The Description has been replaced with the "Test Intro". You can enter here a brief introduction for the test, describing it or the rules that apply, hints etc.

Options

- Allow Select Questions:
If you set this option, students may choose the question when taking a test. Unset it, the questions will be displayed according to their sort order, no "skipping" allowed.

3.2 Run Test

First you'll be shown the introduction of the test along with the timelimit (if it has one) and how often the test can be taken. Click the button to start the test.

("Go to previous" has been removed).

According to the test options, you may choose the question you want to answer from the combo box or you have to go through them one by one.
